

Registration, Evaluation, Authorization and Restriction of Chemicals

Accurate Manufactured Products Group (AMPG) has reviewed the requirements of REACH as they apply to our suppliers, our customers and our own operations. REACH requires registration for individual substances¹ (on their own or in preparations²) greater than one metric ton per year produced or imported. The products we sell are considered as ARTICLES under REACH so they are exempt from the registration requirement. Based on our knowledge, they do not contain any substances above the legal threshold that are on the list of 253 SVHC's.

Accurate Manufactured Products Group (AMPG) is not located in the EU and does not have a representative within the EU. Each importer is responsible for its own compliance with REACH. We recommend that you consult the REACH web site at <http://echa.europa.eu>.

Sincerely,

AMPG Quality Team

¹ Substance: a chemical element and its compounds in the natural state of obtained by any manufacturing process, including any additive necessary to preserve its stability and any impurity deriving from the process used, but excluding any solvent which may be separated without affecting the stability of the substance or changing its composition (REACH, Article 3.1)

² Preparation: means a mixture of solution composed of two or more substances (REACH Article 3.2)
